

SLD's Bunded Fuel Tanks

Whether you need a long run tank option, in conjunction with your generator or pump, or you just require additional fuel storage capacity, then SLD's Bunded Fuel Tanks offer the quality and value you need.

The tanks represent the latest in product development and are long lasting. They are manufactured in the UK using state-of-the-art laser and robotic technology.

They meet ADR and UN requirements and comply with Pollution Protection Guidelines (PPG2/PPG26).

Bunded Fuel Tanks

SLD's bunded fuel tanks offer a quality and durability that can only be achieved with stringent quality control. Our hire fleet tank range features the capacities detailed below.

Model	Capacity		Dimensions (mm)			Weight (kg)	Weight (kg)
	Litres	Gallons	Length	Width	Height	Dry	Wet
G748	2,000	400	2,480	1,120	1,160	820	2,820
G749	3,000	600	2,480	1,590	1,160	860	3,860

In harmony with the environment

Bunded tanks prevent accidental leakage of hazardous fuels and phosphates into the environment. All fuels must be stored and transported in an inner bunded tank to comply with current legislation.
