

Fuel Management Service

February 2008 Information Sheet No 2

Do you require Diesel Fuel to be delivered to your site ?	✓
Do you have to take time out from your day to day activities to order this fuel ?	✓
Would you like someone to lighten your workload ?	✓
Can we assist you with this request ?	✓

Competitive Prices

However good the service, we know you want to pay the right price for peace of mind. So, once we know the volumes you require, we agree a price that reflects the current market fuel costs, the delivery location and the frequency you need it delivering, all to help you control your monthly outgoings.

Managed Service

Because we know the equipment you are using, the working hours you have told us and the rate they consume the fuel, we can guarantee you will not run out of fuel. Our forward planning will ensure delivery to match your fuel consumption and fuel storage capacity. You will never over-order or forget.

Flexible Deliveries

We deliver the volumes you require whenever you need them – even at weekends and on Bank Holidays when agreed in advance. We can even supply fuel for your own equipment or other items you have hired. If your working pattern changes, we can adjust the frequency of deliveries to accommodate your needs– just give us a call.
